

Argo Floats - tracking the pulse of world oceans

Published on LEARNZ (<https://www.learnz.org.nz>)

Welcome to the *Argo Floats* field trip taking place 16-25 June 2014. This LEARNZ field trip is supported by [1]the New Zealand [Ministry of Education](#) [2], [NIWA](#) [3]and [NOAA](#). [4] For similar topics go to the [Field Trip Chooser](#) [5].

Introduction

Argo Floats are mechanical robots that float in the oceans and send important information to satellites. This voyage onboard the *RV Tangaroa* will have scientists from NIWA, NOAA and [CSIRO](#) [6] who will be deploying both 'regular' Argo Floats and a new Deep Argo Float that will descend to 5,500m below the surface.

View the [preview slideshow](#) [7] and watch the [intro video](#) [8] for an overview of the field trip.

Location

Your journey starts in Wellington where you will board the *RV Tangaroa* for a 9-day voyage north-east toward the Kermadec Islands, where the sea floor is over 5,000m deep! You will return to Auckland on the 25th of June.

Field Trip Plan - June 2014

Wednesday , 25 June	The journey ends. Join Shelley and the ambassadors as you return from your 9-day voyage to Auckland aboard the <i>RV Tangaroa</i> . Read Shelley's diaries
