

## Web Conference Summary

School/Class 18

Field Trip Name River Restoration

Date/Time 28/7/20

Topic Waikanae river values

Location Waikanae river

Guest Experts

Natasha Petrove  
Department of Conservation

### Questions and Summarised Answers

1. How far apart are the mountain and sea that the river is connected too?  
32 km.

6. If there were no rivers we would die.

4. About 17 species of fish and 63 birds.

10. 8 major streams but possibly 100's.

5. What would happen if there was snow in the Waikanae river? It wouldn't change anything in the river, but it would affect river in the south.

Key message we got from the web-conference

you got to protect the rivers.  
the amount of sediment affects the ecosystem

A surprising fact we learnt today..

The main stone in the Waikanae river is the (Greywacke)

Where to now? Next Steps..

We might study into it.
